COVID-19 Contact Tracing

The Naugatuck Valley Health District is working closely with partners in the Valley, such as schools, daycare centers, and sports leagues. We are also working closely with our partners at the state and federal level to protect you, your family and the community.

What is contact tracing?

The process of contacting all people who have tested positive for a virus (such as COVID-19) or have had contact with someone who tested positive. The more cases and contacts are identified, the more likely we are to slow the spread of COVID-19.

What will they ask me?

You will be asked to confirm your “date of birth” to make sure we are speaking with the correct person. Once identity is confirmed, we will ask you about how you are feeling, let you know about resources that are available, and ask a couple questions about people you may have spent time with.

Any information shared with the health department staff remains confidential.

FAQ

Q: Where did you get my information?

A: Your testing facility forwards your positive results to your local health department.

Q: How do I know this isn't a scam?

A: You can verify the phone number the contact tracer is calling from and no financial information will be solicited.

Q: Will my information be shared with anyone?

A: NO! Any information you share with health department employees remains 100% confidential, including name, immigration status, employment status, etc.
