Seymour Public Schools Curriculum

Grade Four Physical Education Curriculum

Most object-control skills, locomotor skills, knowledge and activity skill objectives are taught in a “Spiral” fashion. Steps in the teaching/learning progression are introduced and/or reviewed in several lessons per grade. Each lesson is dedicated to instruction in a particular skill as well as a personal/social skill component of good sportsmanship.

The fitness objectives do not “spiral”, but instead are focused on helping students achieve grade level standards through a variety of exercises.

Each lesson will consist of:

- **Objective:** The lesson objective will describe the desired student performance.
- **Instruction/Demonstration:** Based on research instruction will be provided to motivate students, clearly explain the lesson’s objectives, and maximize student practice and review the day’s work.
- **Practice:** Maximizing time on task, students will apply and rehearse what was just explained and demonstrated. All students will be provided with equal amounts of practice, so activities do not eliminate less-skilled students.
- **Review:** Students will recall what they just learned.
- **Assessments:** Rubrics are used as a pretest and/or posttest to provide information on how well students are mastering the content taught and whether students are progressing through the steps taught by achieving grade level benchmarks.
- **Follow-up (as needed):** After assessing student application of the skills during the activity, the students will be provided with additional time on task as needed.
Seymour Public Schools Curriculum

Elementary Physical Education Teachers

Melissa Drozd
Carol Perez

Physical Education Philosophy

Physical education is an integral part of our educational process. Our program contributes significantly to the optimal development of each student, and it is designed to promote a healthy lifestyle through a multi-disciplinary approach.

The physically educated person is:
- Physically conditioned for life’s demands
- Motivated to be physically active
- Skilled in health-enhancing physical activities
- Prepared for citizenship
- Safely equipped

Instruction is based on clearly stated outcomes.

Physical Education Learner Goal

All students will develop physical skills in sports and recreational activities; develop physical fitness; acquire knowledge and appreciation of sports and physical activity as lifetime recreational activities; and demonstrate attributes of good sportsmanship. Differentiation, modifications and accommodations are used based on the needs of each student.

### CSDE Standard

**Connecticut Content Standard 9: Object-Control Skills**

### Enduring Understanding

The intent of this standard is development of the physical skills needed to enjoy participation in physical activities. Mastering movement fundamentals establishes a foundation to facilitate continued motor skill acquisition and gives students the capacity for successful and advanced levels of performance to further the likelihood of participation on a daily basis.

### Essential Questions

**Essential question: What different ways can the body move given a specific purpose?**

### Content Standards:

**Students will demonstrate competency in motor skills and movement patterns needed to perform a variety of physical activities.** (NASPE Standard 1; Connecticut Content Standard 9)

### Performance Expectations (Student outcomes)

- **E 9.1** Students will demonstrate developmentally mature form in the fundamental movement skills in the fundamental movement skills: locomotor and nonlocomotor and manipulative, in a closed environment (skills in isolation)

- **E9.2** Demonstrate simple applications combining locomotor, nonlocomotor and manipulative skills to participate in developmentally appropriate movement and fitness activities.

- **E9.3** Explore and adapt fundamental movement skills in a variety of dynamic environments
## E9.4 Acquire beginning skills for a few specialized movement forms

- Batting
- Catch Fly Balls
- Catch Rolling Balls
- Foot Dribble
- Forehand Strike
- Hand Dribble
- Instep Kick
- Lift and Carry Posture
- Overhand Throw
- Underhand Strike
- Underhand Throw

## Materials/Resources (examples)

- Variety of balls
- Bean Bags
- Balloons
- Targets
- Cones or tees
- Bats
- Bases

## Assessments (examples)

**Students will:**
1. Dribbles a ball with his or her foot while changing pathways, directions, and speed
2. Catches an object thrown overhand with varying degrees of force and speed
3. Kicks a stationary or rolling ball with the inside or instep of the foot
4. Volleys a tossed object back to a partner, using hands, arms, or equipment

**Basketball:**
1. Dribbles a ball with either hand while changing pathways, directions, and speed
2. Dribbles a ball increasing speed and maintaining control
3. Develops proper technique for a bounce pass and chest pass to a partner 10 feet
4. Develops introductory technique for shooting (i.e., ready position, release, follow through)

**Softball:**
1. When throwing, demonstrates trunk rotation, hand/foot opposition, and follow through
2. Tracks and catches a thrown or struck ball
3. Steps toward and makes contact with an underhand tossed ball, using a bat
4. Demonstrates base running
5. Identifies strategies used in modified games and activities
6. Identifies strategies used in modified games and activities
## CSDE Standard

Content Standard 10: Applying Concepts and Strategies

### Enduring Understanding

The intent of this standard is facilitation of learners’ ability to use cognitive information to understand and enhance motor skill acquisition and performance. It enhances the ability to use the mind to control or direct one’s performance. This includes the application of concepts from disciplines such as motor learning and development, sport psychology and sociobiology, and biomechanics and exercise physiology.

### Essential Questions

**Essential question:** How can I move effectively and efficiently?

### Content Standards:

Students will demonstrate an understanding of movement concepts, principles, strategies, and tactics as they apply to the learning and performance of physical activities. (NASPE Standard 2; Connecticut Content Standard 10)

### Performance Expectations (Student outcomes)

E10.1 Demonstrate an understanding of what the body does, where the body moves, how the body performs the movement and relationships that occur in movement

E10.2 Recognize critical performance skill elements in self and others using movement vocabulary

E10.3 Demonstrate knowledge of rules, safety practices and procedures of specific outcomes

## Grade: Grade four

### Subject: Physical Education

<table>
<thead>
<tr>
<th>CSDE Standard</th>
<th>Content Standard 11: Engaging in Physical Activity</th>
</tr>
</thead>
</table>

### Enduring Understanding

The intent of this standard is the establishment of patterns of regular participation in meaningful physical activity. This standard connects what is done in the physical education class with the lives of students outside the classroom. Although participation within the physical education class is important, what the student does outside the physical education class is crucial to developing an active, healthy lifestyle that has the potential to help prevent a variety of problems among future generations of adults. Students make use of the skills and knowledge learned in physical education class as they engage in regular physical activity outside the physical education class. They demonstrate effective self-management skills that enable them to participate in physical activity on a regular basis.

### Essential Questions

**Essential question:** What can I do to be physically active and why is this important?

### Content Standards:

Students will participate regularly in physical activity. (NASPE Standard 3; Connecticut Content Standard 11)

### Performance Expectations (Student outcomes)

- **E11.1** Engage in a variety of moderate to vigorous developmentally appropriate physical activities on a regular basis
- **E11.2** Demonstrate an understanding of a variety of movements and how they affect the body
- **E11.3** Apply the understanding of physical activities concepts to developing movement sequences and game strategies
- **E11.4** Engage in appropriate and physical activity during and outside of school that promotes the development and
improvement of physical fitness level.

13. Demonstrates variations of tumbling (e.g., variations of rolls and wheels) |
## Grade: Grade four

## Subject: Physical Education

### CSDE Standard

**Content Standard 12: Physical Fitness**

### Enduring Understanding

The intent of this standard is the development of students’ knowledge, skills and willingness to accept responsibility for personal fitness, leading to an active, healthy lifestyle. Students develop higher levels of basic fitness and physical competence as needed for many work situations and active leisure participation. Health-related fitness components include cardio respiratory endurance, muscular strength and endurance, flexibility and body composition.

### Essential Questions

**Essential question: Why is it important to be physically fit and how can I stay physically fit?**

### Content Standards:

**Students will achieve and maintain a health-enhancing level of physical fitness.** (NASPE Standard 4; Connecticut Content Standard 12)

### Performance Expectations (Student outcomes)

- E12.1 Demonstrate understanding of the relationship between activities and physical fitness components (e.g. cardio respiratory endurance, muscular strength and endurance, flexibility, nutritional status and body composition)
- E12.2 Recognize physiological indicators (e.g. heart rate, body temperature, perspiration, thirst) of exercise during and after physical activity
- E12.3 Understand the results of formal fitness testing and correctly associate these results with overall physical fitness,

## Grade: Grade four

### Subject: Physical Education

### CSDE Standard

#### Content Standard 13: Personal / Social Skills

#### Enduring Understanding

The intent of this standard is the achievement of self-initiated behaviors that promote personal and group success in activity settings. These include safe practices, adherence to rules and procedures, etiquette, cooperation and teamwork, ethical behavior and positive social interaction. Key to this standard is developing respect for individual similarities and differences through positive interaction among participants in physical activity. Similarities and differences include characteristics of culture, ethnicity, motor performance, disabilities, physical characteristics (e.g., strength, size, shape), gender, age, race and socioeconomic status.

#### Essential Questions

**Essential question:** How do I interact with others during physical activity?

#### Content Standards:

**Students will exhibit responsible personal and social behavior that respects self and others in physical activity settings.** (NASPE Standard 5; Connecticut Content Standard 13)

#### Performance Expectations (Student outcomes)

E13.1 Understand, participate in the development of, and follow classroom rules; follow activity-specific rules, safety practices and procedures; and demonstrate etiquette and good sportsmanship in a variety of physical settings

E13.2 Work independently or cooperatively and productively with partners or in small groups to complete assigned tasks.
E13.3 Demonstrate behaviors that are sensitive to individual differences (e.g., physical, gender, cultural/ethnic, social and emotional) that can affect group activities

E13.4 Develop skills needed for resolving conflicts peacefully

Connecticut Physical Fitness Assessment Implementation September 2009 for Grade Four
Seymour Public Schools Curriculum

Resources

*EPEC Exemplary Physical Education Curriculum Grades K-5*

PE Central (http://www.pecentral.org)
Connecticut Physical Fitness Assessment
Implementation September 2009
For Grade Four

Connecticut’s 3rd Generation Physical Fitness Assessment Program is slated for implementation in September 2009. The changes will be evolutionary (not revolutionary), with improvements to most tests expected to increase validity and reliability as well as administrative manageability.

Here are the most important highlights of the updated fitness assessment:

For the 2008-09 school year

1. the fitness assessment test battery, testing periods and reporting dates will be unchanged.
2. the test administrators' manual is the same as last year.

For the 2009-10 school year

3. there will be a significant change in the aerobic capacity test. Districts will have the option of using the one-mile run/walk or the P.A.C.E.R. to determine VO2MAX.
4. performance criteria for the curl-up test is revised.
5. performance criteria for the sit-and-reach is revised.
6. the shoulder stretch has been added as an optional activity (results not reported to state database) for instructional purposes.

CT's fitness assessment aligns with the national movement to encourage adults to assess their own health-related physical fitness.

Improvements to the fitness assessment represent one component of a larger physical fitness promotion program statewide.
Seymour Public Schools Curriculum

The primary purposes of the physical fitness assessment program continue to be individual fitness assessment and monitoring, identification of strengths and weaknesses in health-related physical fitness, to inform students and their families of health-related physical fitness status and ways to improve, and to inform program improvement.

During the 2008-09 school year there will be numerous opportunities for professional development, demonstrations and explanations, as well as resource and management sharing forums to learn about the updated test. Among other venues, the CTAHPERD Conference will host a relevant session on each of the 2 days of the Fall Conference. Materials will be distributed to all districts in the state. The "new test" will be implemented effective September 2009.
