

March 3, 2020

Dear Seymour School Community,

We know that you have already received communications from our Head Nurse, Mrs. Rebecca Bennett about the preventing the spread of germs to help prevent the flu as well as information on the Coronavirus. As the Director of Facilities for Seymour, my department takes these precautions very seriously to help minimize the spread of germs.

Throughout the year, our custodians not only clean, but also disinfect surfaces in our schools to help prevent the spread of germs. Some of the things that we do in order to combat the spread of germs are disinfecting door handles and surfaces used by our students throughout the day.

Additionally, our teachers are provided with disinfectant wipes for both surfaces and hands. These are for both them and our students to use on any hard surface as well as on their hands. Additionally, we have several hand sanitizing stations located throughout our buildings so that both adults and students can remain vigilant about preventing the spread of germs.

We work collaboratively with our building Administrators to not only handle cleaning situations as they arise, but to also be proactive throughout the day to clean surfaces that our students have touched. This is just one other way for us to try to minimize the germs in our buildings. If you have any questions, please feel free to call or email me.

Thank you,

Tim Connors – Facilities Director
