

# HEALTH SCREENING PROTOCOL

Per Executive Order 7Q and OEC Memo 15, all children and staff must be screened before they can enter the program. These protocols are in place to help keep you, your children, and child care providers safe.

**Thank you for your cooperation!**

## **Required screening before children and child care workers enter:**

- ◆ Screen for observable illness (e.g. cough or respiratory distress)

## **Some other protocols you are likely to see:**

- ◆ Keeping distance and/or physical barriers
- ◆ Asking questions about your child's health, such as confirming they have not been given a fever-reducing medicine
- ◆ Increased handwashing or use of hand sanitizer
- ◆ Increased disinfection and cleaning methods
